

ALEXIA KIM M. NOOL

Purok Centro Apsayan, Gerona, Tarlac, 2302 | 0939 335 4911 | alexia28kim@gmail.com

PROFILE

- Full-Stack Developer with hands-on experience designing and deploying responsive web applications and secure backend systems using React, TypeScript, Node.js, and Python (Flask, FastAPI). Proven track record of developing real-world solutions, including a biometric and OCR-enabled pensioner verification platform for local government units. Consistent Dean's Lister dedicated to clean code, scalable architecture, and user-centric design.

CORE SKILLS

- Frontend:** React, TypeScript, JavaScript, Tailwind CSS
- Backend & Databases:** Node.js, Express.js, Python (Flask, FastAPI), PostgreSQL
- UI/UX & Design:** Figma, Adobe Photoshop, Canva
- Multimedia & Tools:** Git, GitHub, DaVinci Resolve, Adobe After Effects, CapCut
- English Writing Skills

WORK EXPERIENCE

Web-Based Pensioner Verification System — MSWD & OSCA, Gerona, Tarlac (Capstone Project) 2026 - Present

- Collaborated in the development of a full-stack web-based system for the Municipal Social Welfare and Development Office (MSWD) and Office for Senior Citizens Affairs (OSCA) of Gerona, streamlining pensioner/beneficiary registration and identity verification.
- Implemented biometric identity verification using facial recognition (HOG) and active liveness detection, alongside automated OCR scanning of National IDs to digitize demographic data on capture.
- Built a responsive front end in React.js (TypeScript) with Tailwind CSS, and integrated Google authentication, SMS notifications, and Supabase-based image storage for a seamless user experience.
- Contributed to backend development across Node.js/Express.js, Flask, and FastAPI services, using Prisma ORM with PostgreSQL and applying AES-256 encryption to protect sensitive data.
- Continue to support ongoing feature updates, bug fixes, and system improvements based on office feedback, working directly with MSWD and OSCA staff to align the system with real-world registration and verification workflows.

Tech Stack: React (TypeScript), Tailwind CSS, Node.js (Express), Python (Flask, FastAPI), PostgreSQL, Prisma ORM, Supabase, Semaphore SMS API

Inflexion AI by Remoat Team February - December 2024

Inflexion AI provides real-time call transcription and AI-driven workflow support for healthcare and other industries.

- Provided exemplary customer service by ensuring all contact points with the company met high standards.
- Supported a range of authorization workflows, leveraging Inflexion AI's advanced technology for accuracy and speed.
- Maintained a high SLA response rate on medical authorization queries, consistently meeting agreed response-time targets and earning positive customer survey feedback.

PROJECTS

AM Interior — Client Portfolio Website (Freelance Project)

- Designed and built a multi-page portfolio website (Home, Gallery, About, Contact) for an interior design/architecture client, showcasing residential and commercial projects.
- Developed a fully responsive, custom front end with HTML, CSS, and JavaScript, deployed live on Netlify.
